

Any light, anywhere, any time.

Do you blink or squint your eyes in bright light? Sensity lenses provide more comfortable vision in all different light situations. At the same time, they don't compromise on contrast or colour perception. Sensity offers a choice of deep, natural tints that harmonise with sun lens trends, thus providing a contemporary look.

Silver Grey

Bronze Brown

Emerald Green*

*Not available for Sensity Fast

Oceanic Blue*

*Only Available on Sensity 2

The Sensity family is available in natural colours. However, Sensity Shine has a matching light mirror coating for each colour.

Sensity Shine Bronze Brown Light mirror copper Provides extra contrast

Sensity Shine Silver Grey Light mirror silver Protects in intense light conditions

Sensity Shine Emerald Green Light mirror blue Provides even colour perception and improved contrast by reducing blue light transmission

Silver Grey - light mirror silver

**Fade faster.
See clearer.**

**Introducing Sensity
light-adaptive Lenses**

A solution for any lifestyle

Sensity, Sensity Shine, Sensity Dark and Sensity Fast:

- Solid performance in different climates and seasons
- Darken outdoors and become exceptionally clear indoors
- Protect against UV rays
- Reduce glare

Find out which Sensity lenses are best for you!

Sensity Clear vision in any light

If you value a versatile lifestyle and consider yourself an active person, then Sensity is the perfect solution for you.

Our latest generation of light-adaptive lenses darken outdoors to a category 3 sun lens and become exceptionally clear indoors, for comfortable vision in any climate or season. With a quick fade back speed, and 100% UV protection at all times, you can enjoy all aspects of life with continued comfort and protection.

Sensity Fast Fast Fade Back Indoors

We know how busy life can get, and it's important that your lenses can keep up with you, wherever you go. With Sensity Fast you can experience a fast fade-back speed when returning indoors.

Sensity Fast lenses darken to category 2 sunlens tint outdoors and fade back to half clear indoors in seconds. They are the fastest light adaptive lenses and can satisfy the needs of the most active and demanding photochromic wearer and are ideal if you are moving in and outdoors frequently.

Sensity Shine Stand out with extra style

Are you looking for a new type of sun lens that is functional and fashionable at the same time? Sensity Shine offers more; the lenses embody the evolution of the sun lens.

They give you an exclusive look thanks to a mirror coating that is more intense in the light yet subtle when indoors. The lenses also deliver extra darkness when outdoors. Sensity Shine is great when you want to make a style statement.

Sensity Dark Clear vision for any activity

Cycling, fishing, driving, playing golf, running – Sensity Dark lenses are great when you spend a lot of your time outdoors. The lenses react to both UV and visible light. It means that when you experience super-intense light or high temperatures, Sensity Dark lenses bring extra comfort.

They even darken behind the car windscreen and most spectacular of all: the lenses fade back to clear when returning indoors.
